Subject: RE: Nafion Byproducts 1 & 2 test standards

Emily,

Chemours synthesized the Nafion BP1 and BP2 and shared it with R4 and myself. We are currently undergoing the collection of other PFAS we did not have standards for this summer and determining if our estimations of the concentration in the Cape Fear water were good or not. The collection of chemical standards that are new is not easy. Unfortunately it is slow and time consuming. In each instance a chemical needs to be synthesized and purified for us to do our work properly. We are moving in the right direction though.

Take Care,

Mark

Subject: Nafion Byproducts 1 & 2 test standards

Hi Mark,

Just checking in to see if the EPA has created test standards yet for Nafion Byproducts 1 & 2? Can you help me track that information down?

Last information I heard, EPA Athens was developing test standards for Nafion BP1&2. That was back in January.

Any guidance is greatly appreciated.

All the best,

e.
